

**For:** Cotton CMA's and LSA's

**Modifications to the Cotton Online Processing System (COPS) to Process Cotton  
Loan Transfers, Determining Storage Stop Date for Transferred Cotton, and  
Producer Implication of Transfers and Forfeitures**

**Approved by:** Acting Deputy Administrator, Farm Programs

---

**1 Overview**

**A Background**

According to 7 CFR 1427.16, cotton loan collateral may be transferred to another approved location during the loan period.

Notice CN-1015 provided information to State and County Offices, CMA's, and LSA's about the interim and long-term loan cotton transfer processes.

Software to support the long-term transfer process has been developed and is now in production.

**B Purpose**

This notice provides information to cotton CMA's and LSA's about the following:

- processing cotton loan transfers in COPS
- determining the "Storage Stop Date" for transferred cotton
- producer implications about transfers
- implications of cotton transfers and forfeiture charges for producers.

---

**Disposal Date**

January 1, 2008  
3-23-07

**Distribution**

Cotton CMA's, and LSA's

## 1 Overview (Continued)

### C Contact

CMA's and LSA's shall direct questions about this notice to:

- Julie Floriani about automation issues by either of the following:
  - telephone at 202-720-8374
  - e-mail to **julie.floriani@wdc.usda.gov**
- Gene Rosera about policy issues by either of the following:
  - telephone at 202-720-8481
  - e-mail to **gene.rosera@wdc.usda.gov**

## 2 Transfer Process

### A Updating Electronic Warehouse Receipts (EWR's) to Pending Transfer Status

A transfer may be requested by CMA, LSA, or merchant and will be submitted to the EWR Provider. If the request passes the EWR Provider validations, the request will be sent to COPS. This request will identify each bale to be transferred by:

- warehouse code
- receipt number
- gin code
- gin tag number
- crop year.

**Note:** At this point, EWR's can only be canceled or returned to CCC.

COPS will further validate EWR's for the following:

- same EWR Provider
- is currently under loan
- must be more than 30 calendar days before maturity
- bale contains no COPS/ACRS errors.

**Note:** All EWR's in a single shipping order must pass validation for the transfer to be approved.

## 2 Transfer Process (Continued)

### A Updating Electronic Warehouse Receipts (EWR's) to Pending Transfer Status (Continued)

Once validated, the shipping order will be posted in COPS for KCCO approval/disapproval. KCCO will:

- approve or disapprove the transfer
- set the 75-day storage indicator.

**Note:** COPS will notify the EWR Provider of KCCO's approval or disapproval.

If the transfer request is approved, COPS will:

- generate an e-mail to CMA's or LSA's advising of "Pending Transfer" status
- update EWR's to a "Pending Transfer" status with code "G"

**Note:** The status can be viewed on the COPS Bale Information Screen.

- release EWR's to the storing warehouse

**Note:** CCC will remain the holder in COPS.

- provide view/download options for approved transfers.

**Note:** This option will be available in a forthcoming software modification.

Once EWR's are in "Pending Transfer" status, no further action shall occur until the transfer has been completed, canceled, or terminated. This includes "T", "U", or "I" transactions as well as repayments.

## 2 Transfer Process (Continued)

### B Updating EWR's to "Receipt in Transit" Status

When the bales are shipped from the storing warehouse to the receiving warehouse, COPS will receive a file indicating the following for each bale:

- warehouse code
- warehouse receipt number
- gin code
- gin tag number
- crop year
- date of shipment.

COPS will update the EWR record with the following:

- date of shipment
- "Receipt in Transit" status with code "R".

**Note:** The status can be viewed on the COPS Bale Information Screen.

### C Updating EWR's to "Transfer Complete" Status

After each bale has been transferred, COPS will:

- update the EWR record with the following data:
  - new warehouse code
  - new warehouse receipt number
  - new EWR issue date
  - current holder is CCC

**Note:** Any subsequent action that occurs will use the original warehouse code and receipt number.

- update EWR to "Transfer Complete" status with code "T"

**Note:** The status can be viewed on the COPS Bale Information Screen.

- unlock bale for any subsequent transactions except another loan/LDP.

After all bales on a shipping order have been transferred, COPS will create an e-mail to CMA's and LSA's informing them of the following:

- the transfer is complete
- subsequent action except another loan/LDP can be processed.

### 3 CMA and LSA Action

#### A Determining Storage Stop Date for Transferred Cotton

CMA's and LSA's shall complete ACRS Transaction, Storage Stop Date, Field 34 for transferred cotton according to the following.

IF the bale was approved for transfer and the 75-day storage indicator is...	THEN the "Storage Stop Date" shall be...
"Y"	the lesser of either: <ul style="list-style-type: none"> <li>• EWR issue date at the receiving warehouse plus 74 calendar days, minus 2 days fixed transit period</li> <li>• Repayment date minus 2 day fixed transit period.</li> </ul>
"N"	repayment date minus 2-day fixed transit period-

#### B Error Resolution

CMA's and LSA's were requested to suspend error corrections during the interim transfer period. Error resolution shall now be resumed.

## 4 Viewing Transfer Data in COPS

### A Revised COPS Screens

The following is an example of the COPS Bale Information Screen that has been revised to include transfer data.

#### 4 Viewing Transfer Data in COPS (Continued)

##### A Revised COPS Screens (Continued)

The status indicator will be 1 of the following:

- “G” when the bale is in “Pending Transfer” status and approved for transfer
- “R” when the bale is in “Receipt in Transit” status and has been shipped from the shipping warehouse
- “T” when the bale is in “Transfer Complete” status and has been receipted in the receiving warehouse.

**Note:** When the status is updated to “T”, the bale detail will also show the new receiving warehouse code and receipt number.

To view detailed transfer history, users shall CLICK “Transfer History” on the COPS Bale Information Screen. The following is an example of the COPS Transfer Information Screen.

## **5 Transfer Implications for Producers**

### **A Loan Repayment Implications**

Transferred cotton loan collateral will be redeemed based on the loan terms and rates applicable at the original storing location. In most cases, the loan obligation will be repaid by the producer's agent and the producer will play no role in this redemption.

The transfer of loan cotton is not anticipated to cause losses or damages to the cotton. However, any time cotton is moved there is some risk that, while in transit, the bale may be lost or misdirected, or be damaged such that it is rejected by the receiving warehouse. If these events occur at a time when there is no warehouse receipt for the cotton, the original warehouse receipt having been canceled, and a new receipt not issued by the intended receiving warehouse, CCC will require immediate repayment of the loan obligation for these bales at a rate effective on the date the original receipt was canceled.

Notification of this early redemption requirement will be sent to the producer and copied to the current EWR subholder of the bales. CCC will request repayment within 15 calendar days from notification. Under normal circumstances, the producer's agent (bale EWR subholder) who transferred the loan cotton will be redeeming these bales.

### **B Producer Charges Associated With Forfeitures of Transferred Cotton**

Cotton that has been transferred to a new storing location is unlikely to ever be forfeited to CCC. Merchants that relocate loan cotton are required to pre-pay receiving costs, accrued storage, load-out, and compression, if applicable, to the original storing location, plus transportation to the new location. Given these transfer costs, it is anticipated that merchants will redeem from loan and sell all transferred loan cotton.

Still, producers should be aware that the charges associated with forfeiting transferred loan bales vary from those of a normal forfeiture. Charges billed to the producer for transferred, forfeited bales will be based on tariffs at the receiving warehouse, and not tariffs at the original storing warehouse. Because the cotton was already under loan when receipted at the receiving warehouse, there would be no pre-loan accrued storage at the receiving warehouse. Therefore, the charges billed to the producer would be limited to the following:

- any unpaid receiving charge at the receiving warehouse
- compression at the receiving warehouse, if any
- for the period of storage only at the receiving warehouse, any difference between the loan cotton storage rate and the storage-credit rate.

## 6 Producer Charges Associated With Forfeitures of Nontransferred Cotton

### A Producer Charges

Cotton regulation revisions in FY 2006 provide for the following 2 new charges to be billed to producers who forfeit loan cotton to CCC in satisfaction of their loan obligation.

- **Unpaid warehouse compression.** Warehouse compression is a tariff levied by warehouses that is separate from any compression billed by ginner. It is charged by a majority of warehouses and is **not** authorized to be offset from loan proceeds. If, at the time of forfeiture, a bale EWR indicates that warehouse compression is not paid, the amount of that tariff will be included on the producer collection invoice. Although this tariff is collected from the producer, CCC does not pay it to the warehouse. Instead, CCC will sell the cotton on the basis of “compression due.” This means CCC will sell the cotton at a price reduced by the amount of the compression, but the buyer of the cotton must pay the compression charge to the warehouse. The result is that CCC does not either pay this tariff or absorb it through a reduced sales price when its inventory is sold.
- **Excess storage credit.** Starting with the 2006 crop, storage credits are provided based on the lower of the warehouse 2005 tariff rate or a monthly storage-credit maximum of either of the following:
  - \$4.37 per bale for California and Arizona
  - \$2.66 per bale for all other States where the cotton is stored.

In all cases, these storage credits continue to be calculated on the daily-rate equivalent of monthly rates.

**Example:** A bale has been stored in a warehouse having a loan-cotton storage rate of \$3.00 per month and a maximum storage credit rate of \$2.66 per month. At the end of an 8-month loan period, the producer would be billed for the storage paid to the warehouse exceeding the maximum rate.

$$8 \text{ months} \times (\$3.00 - \$2.66) = \$2.72 \text{ per bale.}$$

In addition of these 2 new charges, producers will continue to be billed for the following:

- unpaid warehouse receiving charges
- accrued warehouse storage charges for any period up to the “date documents received” for the loan.
